Criteria	Score
Proper Randomization (2)	
Placebo (0 if no placebo, 1 if inert, 2 if gold standard)	
Blinding (Double 2, Single 1, No blinding 0)	
Objective measurement (1)	
Sample selection & allocation concealment. (1)	
Sample size more than 21 (1)	
Intervention is cheaper than the gold standard. (1)	
No Conflict of Interest (1)	
Withdrawal/Dropouts mentioned and do not exceed 1 in 5 (20%). (1)	
Coherent endpoints and timing of assessments (1)	
No Co-interventions (1)	
Acceptable Theory (1)	
<b>TOTAL</b>	/15

- 13-15 - Excellent study with substantial evidence
- 10-12 - Good study. Evidence sufficient for practice.
- 7-9 - Average Study. Use the evidence with caution.
- 4-6 - Bad Study. Evidence not suitable for practice.
- 0-3 - Just an anecdotal claim.
